Residential Wastewater Treatment System

ECOPOD-N® Advanced Wastewater Treatment In The Infiltrator IM-1060 Tank

ECOPOD-N is the clear choice for an on-site wastewater disposal system where nitrogen reduction is required. It was tested under Standard 40 and 245 of NSF/ANSI with an average nitrogen reduction of greater than 50% and met and exceeded Class 1 requirements with an average effluent quality of 9 mg/L BOD5 and 8 mg/L TSS.

ECOPOD-N directly contributes to a cleaner, safer environment using the bacteria nature provides. As a result of air being pumped into the system, the bacteria thrive and grow in much greater numbers than would occur naturally. This optimum population of bacteria accelerates the process of breaking down the sewage, making it safe for release into the environment.

ECOPOD-N significantly reduces BOD, TSS, fecal coliforms, and nutrients in the wastewater. Nitrification and denitrification occur in a single tank.

ECOPOD-N series uses a fixed film process which is characteristically stable, reliable and sturdy due to its stability. Fixed film is the preferred treatment process for wastewater treatment systems.

ECOPOD-N Available Offering In the Infiltrator IM-1060 Tank

ECOPOD-N Units are manufactured to specifications according to wastewater flow requirements. Units are available in the following sizes:

- Model E50-N IM-1060 treating 500 gallons per day
- Model E60-N IM-1060 treating 600 gallons per day
- Model E75-N IM-1060 treating 750 gallons per day

ECOPOD-N and Infiltrator IM-1060 TANK

An Easy, Transportable and Installed Onsite Treatment Package

Why Use ECOPOD-N® Advanced Wastewater Treatment?

- Built with technology which meets NSF/ANSI 40 and 245 – Class 1
- Completely submerged reactor disposes of wastewater quietly, efficiently, and with no odor
- Effluent quality of 9 mg/L BOD5 and 8 mg/L TSS (per NSF testing)
- No inner tank filters, screens or diffusers to service
- Patented non-clogging air delivery system
- Remote mount air compressor
- Low initial capital cost and operation
- Complete on-site system designs
- ECOPOD-N treatment systems are pre-engineered, requiring no special expertise to design, specify, or install
- True attached growth system – no mixed liquor
- Integral clarifier – no external clarifier required
- Lightweight
- Water tight

Design Components Material Specifications

Shown is the ECOPOD-N 50 IM-1060

Treatment Capacity	500 GPD
Electrical Requirement	115/1/60
Aerator Compressor	EN50

Other Delta Treatment Systems Products

A respected leader in wastewater treatment with decades of technical design and manufacturing experience, Delta Treatment Systems is committed to the continuing development of new products in the 21st century.
