INFORMATION

"Only the **DIRTY BIRD**™ has been purposely designed, engineered and developed to serve as a concealment device for septic system vent pipes. Imitation products are merely existing ornamental products modified for a purpose they were never ***originally*** designed for.

Through several years of research and development, BS Design has created a product that offers an attractive alternative to vent pipes, with an integrated odor-controlling filter that ***meets or exceeds*** all current regulations.

The patented design of the **DIRTY BIRD**™ allows it to easily slip over the vent pipe and subsequently serve as a functional septic system vent and odor control filter.

- *Attractive alternative to current venting/filtration methods and devices*
- *Birdbath designed with birds in mind*
- *Lightweight*
- *Durable*
- *Recyclable*
- *Fade Resistant (UV Stabilized)*
- *5 year warranty on breaking and chipping*
- *Fits 4" ID Sch. 40 PVC pipe (Adaptable to other sizes)*
- *Made in USA*

Materials

- *100% Rotomolded LDPE (Low Density Polyethylene)*
- *All Stainless Steel Hardware*

Overall Dimensions (approximate)

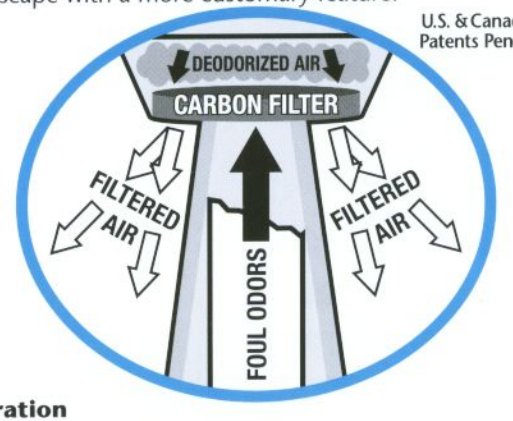
- *Height: 32 inches*
- *Basin width: 23 inches*
- *Footprint: 12.25 inches*

All specifications are subject to change without notice.

VENTILATION

Traditional "candy canes" merely vent septic fumes and foul odors into your yard. The **DIRTY BIRD**™ controls odors through its unique patented air-filtration system and simultaneously replaces an unsightly element of your landscape with a more customary feature.

U.S. & Canadian Patents Pending



Filtration

- *Activated Carbon Impregnated Non-Woven Polyester Filtration Media*
- *User Serviceable Filter Element*

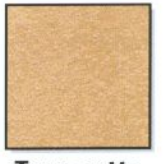
OPTIONS

Colors

Complimenting your current landscaping is easy with several* molded colors to choose from:

Red Granite

Sandstone



Terra cotta

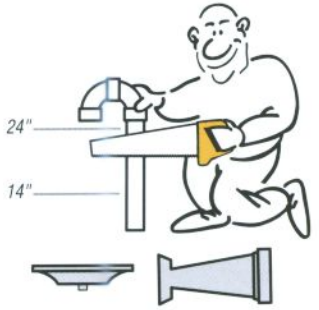
*Call for more color options. Due to printing limitations, colors depicted may not be true to actual product.

Toppers

Don't care for birds? A Terra Cotta Planter Topper is great in existing planting areas.

Don't stop there! The Dirty Bird™ is designed to fit most gazing balls, sundials, and other statuary on top of it's 12.25" pedistal surface.

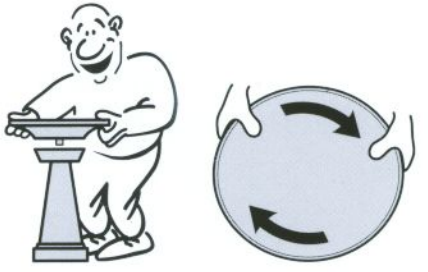
INSTALLATION



1 ***Unpack contents. Make sure ground is fairly level at base of pipe. Cut the pipe with a saw anywhere between 14 and 24 inches from the ground.***

2 ***Slide the pedestal over top of the cut pipe. Push down until base is flush with the ground. Your vent is now fully functional! You can use it as a pedestal* or proceed to the next step.***

*Do not place an item more than 20 lbs. or higher than 12 inches on top of pedestal.



3 ***Align threaded basin stem with hole on pedestal. Turn basin clockwise just until it stops. Your vent has been converted into a beautiful bird bath.***

Basin can be easily removed for periodic cleaning.

THAT'S ALL!

VALIDATION

"I really hated the white vent pipe in my yard and then I found The Dirty Bird™. It really does the job and it looks great too!"

- *Mike G.*
  Haverhill, NH

"Our neighborhood is a four house cul de sac with very non-conventional lot shapes. This means that one neighbor gets to enjoy the next neighbor's septic vent immediately in front of his house."

"The Dirty Bird™ provided the perfect solution to hiding that ugly vent and created a very natural addition to the neighborhood's landscape. We are delighted..."

- *Bruce & Linda L.*
  Southborough, MA

"The typical "candy cane" style vents seen in many yards can detract from the finished landscape. When designing septic systems, there are many cases when there is simply no way to avoid a vent."

"The Dirty Bird™ is a welcome change to the ugly candy cane vents. A great landscape addition, whether as a stand alone birdbath or as part of a garden area. I will not hesitate to recommend them to all my clients who are concerned with the appearance of their yard."

- *BDO Engineering*
  Mansfield, MA
